B2-14

Question 1 Déterminer $\overrightarrow{\mathcal{M}}(B, F)$.

On a $\overrightarrow{\mathcal{M}}(B, F \rightarrow \text{Bride}) = \vec{0}$

Question 2 Déterminer $\overrightarrow{\mathcal{M}}(A, F)$.

$$\overrightarrow{\mathcal{M}}(A, F \rightarrow \text{Bride}) = \overrightarrow{\mathcal{M}}(B, F \rightarrow \text{Bride}) + \overrightarrow{AB} \wedge \vec{F} = (160\vec{x} + 100\vec{y}) \wedge (F_x\vec{x} + F_y\vec{y})$$

$$= ((160\vec{x} + 100\vec{y}) \wedge F_x\vec{x}) + ((160\vec{x} + 100\vec{y}) \wedge F_y\vec{y})$$

$$= (-100F_x + 160F_y)\vec{z} = (-100 \times 1000 \cos 60 + 160 \times 1000 \sin 60)\vec{z} = (-50000 + 138564)\vec{z} = 88564\vec{z}.$$
